A COMPLETE RANGE OF ALUMINIUM TREATMENT CHEMICALS

ALBRIGHT

Albright is versatile acidic detergent designed to remove atmospheric corrosion, road grime and soils from all aluminium surfaces. It can be used as a post weld surface wash to restore the surface to its original finish. It's water miscible which makes it very economical to use and is quick acting, leaving no residual film after rinsing.

Available in 5, 20 and 200 litre containers. Part No. 1300

ALU-WELD

Alu-Weld is a powerful acidic gel designed to quickly remove weld scale, post weld surface contamination and restore the original lustre. It is a gel that will adhere to vertical and overhead surfaces, so it's a one step treatment with no wastage. Completely water rinsable, it comes with an acid resistant brush. If needed, it can be diluted with water.

Available in 2.5kg container. Part No. 1320

PROSOL

Prosol is a unique, non toxic, organic cleaning agent for the surface preparation of aluminium and stainless steel surfaces. When dry it leaves no residue and can be used as a wipe cleaner for the removal of marking pens, fingerprints, grease and oil prior to the welding of aluminium. It is also an excellent cleaner for high finish stainless steel surfaces.

Available in 4 and 20 litre containers. Part No. 5300

S-WELD NEUTRALISING SOLUTION

The Neutraliser is an alkaline solution for the neutralisation of acidic pickling waste. It contains an in-built pH indicator to provide a visual colour change when neutralisation of spent waste has been completed.

Available in 5, 20 and 200 litre drums. Part No. 1150

Callington Haven is an AS/NZS
ISO 9002 Quality Certified Company.

NATA Accredited Laboratory

ASSDA Member

Callington Haven also manufactures a range of quality metal-working fluids. Contact your local distributor for details.
